

LAND USE CONTROL BOARD RECOMMENDATION

CASE #: S.U.P. 08-204

At its regular meeting February 14, 2008, the Memphis and Shelby County Land Use Control Board held a public hearing on the following application requesting a special use permit on the property described as follows:

LOCATION: South side of Tracy Rd., 1634 ft. east of Rosemark Rd.
OWNER OF RECORD: Mary Green
LESSOR/APPLICANT: Tower Ventures V, LLC
PROPERTY SIZE: 6,400 sq. ft. site in a 6.59 acre tract
EXISTING ZONING: Agricultural (AG) District
REQUEST: Cell tower (CMCS), 195 ft tall; "slick stick" design

Billy Orgel, Tower Ventures V, LLC, spoke in support of the application. He described the service needs of the primary carrier and the siting considerations that led to the selection of the proposed location; and stated that application had fully complied with the zoning ordinance requirements for a cell tower special use permit. .

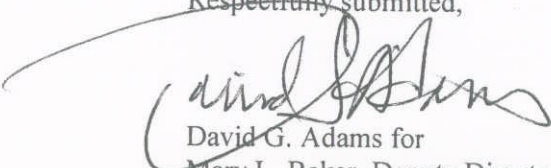

Alisa Rhodes, 9960 Rosemark, 38004 and **Molly Hampton, 8242 Mudville Rd, 38004, representing Rosemark Civic Club** spoke in opposition. They indicated that their major concerns were that the tower would be of character with the landscape, that the tower should be in Tipton County where most of the service need comes from and that more time should be taken to consider alternative designs.

The Land Use Control Board reviewed the special use permit application and the report of the staff. A motion was made and seconded to approve the application with the conditions as submitted by staff.

A motion was made and seconded to approve the application as stated above. This motion passed by a unanimous voice vote.

The Board concurred with the conclusions of the staff as expressed in the revised staff report.

Respectfully submitted,

David G. Adams for
Mary L. Baker, Deputy Director
Office of Planning and Development

Notes: Valuations based on "rule-of-thumb" data provided by the Assessor's Office several years ago. The incremental valuation is taxed through the State Comptroller's office.

Notes: Road traffic generated by a cell tower is minimal except during the initial construction and the addition of collocating antennae. A 75% reduction in the standard allocation for debt service on road construction would result in a zero net impact, based on these estimates.
